

Jin-Ho LIM, MD

Dr. Jin-Ho Lim is the founder of Maria Medical Group.

He is an internationally recognized infertility expert and a pioneer in simplifying IVF treatment. He established the Maria Fertility Hospital in 1989 and produced the first natural cycle IVF baby in Asia.

In the end of 2006, more than 30,000 IVF babies had been born in his 9 IVF Centers in Korea, and they are performing more than 10,000 OPU cycles per year for infertile couples.

He also has an IVF center in Beijing, China.

Maria IVF Centers have been offering IVM or Natural cycle IVF/IVM treatment for patients who has more than 7-8 antral follicles at the beginning of menstruation.

In addition, Dr. Lim is the President of Maria Biotech. Institute in Seoul, Korea, where they first generated human embryonic stem cell (HESC) lines in Korea, and the first 3 of them were registered by NIH, the United States.

Dr. Lim has published many original scientific papers and review articles, and delivered many lectures and presentations in national and international conferences.

Dr. Lim's recent research interests include: 1) Simplification of IVF treatment; 2) Human placental stem cells.
